SERVICE BULLETIN**Special Harrow Brackets for 2800/3800
Equipped with 20" Conser-Tines.**

The existing Kongskilde Harrow systems for 2800 and 3800 series cultivators were originally designed for use with the 2 piece 24" High Clearance Tine on 2.5" x 2.5" toolbars only.

Although the introduction of new 2.5" x 2.5" tine clamps have made it possible to equip both 2800 and 3800 series cultivators with 20" Conser-Tines, the current harrow mounting brackets were not designed for this option and therefore, do not have sufficient clearance or adjustment for the 4" lower position of the 20" Conser-Tine.

Harrow systems designed for the 2600 and 3500 series cultivators can not be mounted to the 2800 or 3800 as these mounting brackets will only fit on a 2" x 3" frame tube.

In order to correct this problem temporarily, special adaptor brackets have been developed for the 2800 and 3800 harrow systems, which will allow them to be mounted to the 2.5" x 2.5" " frame tube of the cultivator with proper clearance and adjustment for the 20" Conser-tines.

This service bulletin affects all 2800 and 3800 Series Cultivators equipped with 20" Conser-Tines and the following harrows:

300SS - Double Rota Harrows

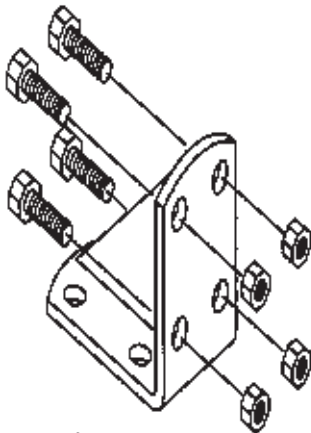

300FS - Flex Spiral Combi Harrows (3 Bar Drag with Single Offset Spiral Rollers)

300DSPK - 3 & 5 Bar Flex Drag Spike Harrows.

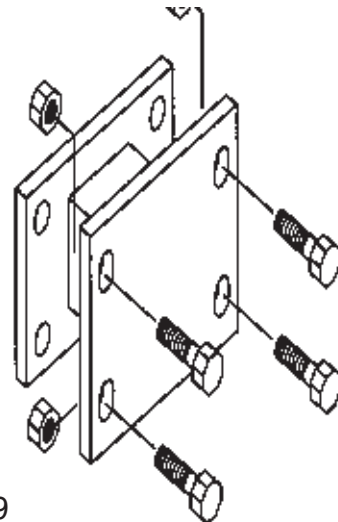

As yet a solution has not been found for the 300SB - Spike Bar Leveller as they cannot be mounted and adjusted 4" lower at this time.

Please refer to the assembly diagrams attached for using the adaptor brackets.

Sincerely,
Kongskilde Ltd.

COMBI & DRAG HARROW
HEIGHT BRACKET ASSEMBLY
FOR 2800 & 3800 WITH
20" CONSER-TINES

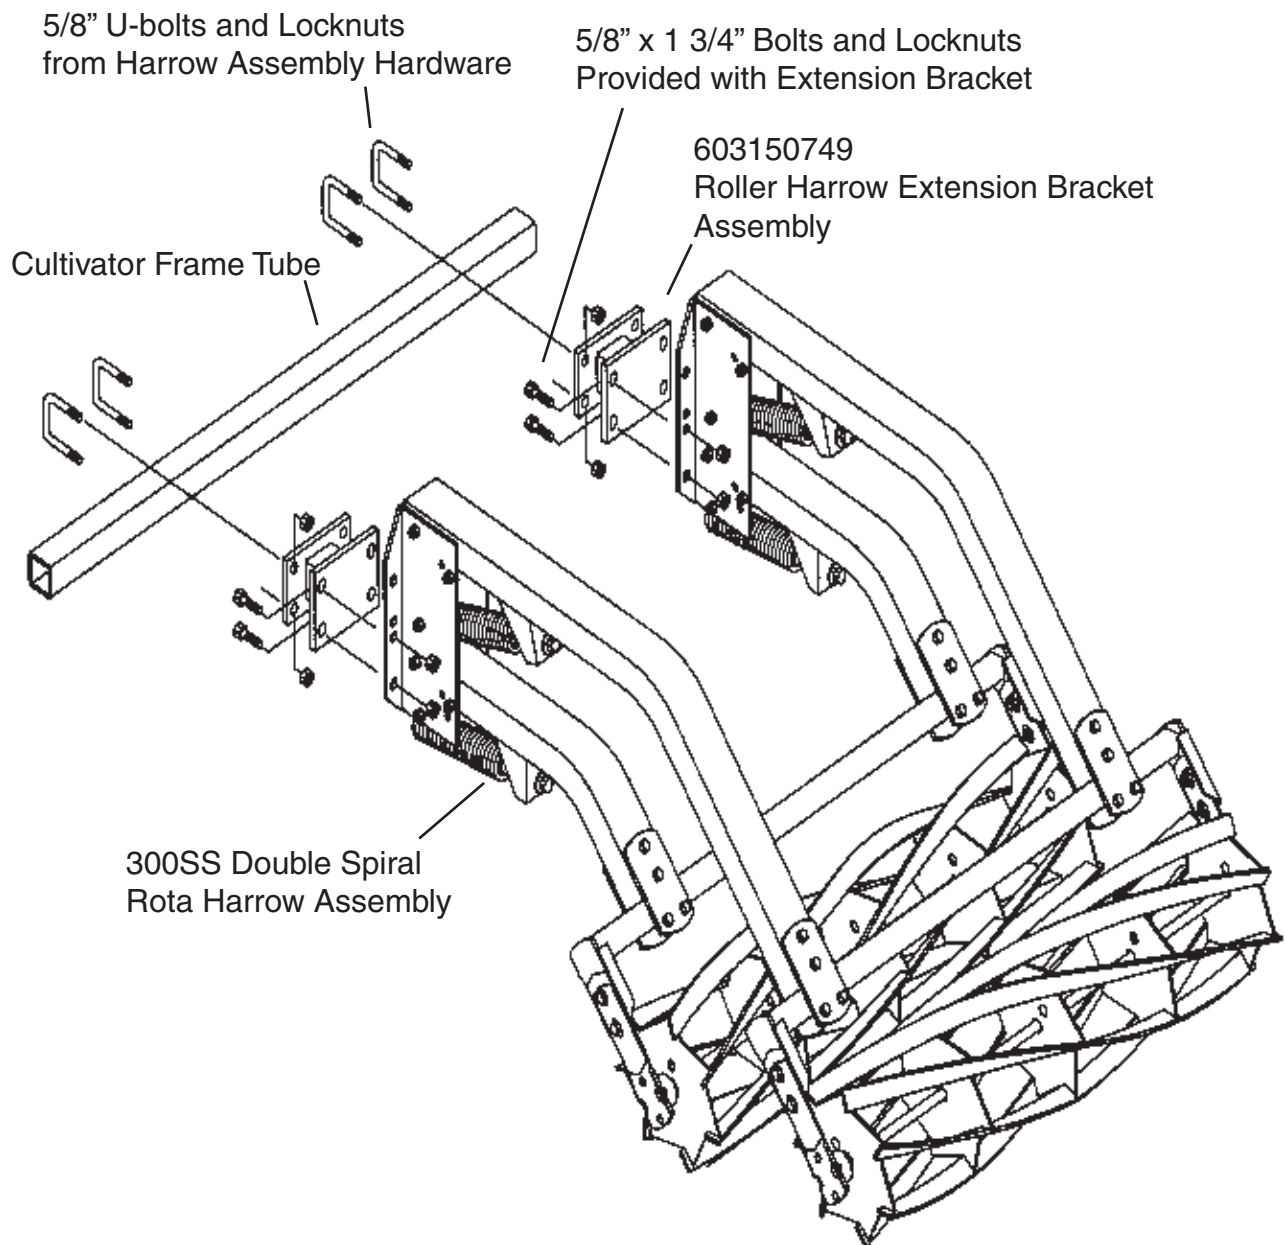

603150749
ROLLER HARROW
EXTENSION BRACKET ASSEMBLY
FOR 2800 & 3800 WITH
20" CONSER-TINES

Install the rota harrow extension bracket between the rear toolbar tube of the 2800 or 3800 Cultivator frame and the 300SS double rota-harrow mounting brackets as shown below.

Use the 5/8" x 1-3/4" Bolts provided with the bracket to attach the extension bracket to the 300SS harrow mounting bracket. Use the lower set of holes for 20" conser-tines and the upper set of holes for 24" high clearance tines.

Use the 5/8" U-Bolts provided with the harrow assembly to attach the extension bracket assembly to the back of the cultivators rear toolbar tube.
Secure with the 5/8" locknuts.

Install the height bracket for combi & drag harrows by attaching the bracket to both the rear toolbar tube of the 2800 or 3800 Cultivator frame and the 300FS or 300DSPK harrow arm mounting brackets as shown below.

Use the 5/8" x 2" Bolts provided with the bracket to attach the height bracket to the harrow arm mounting bracket. Note that the bracket should be installed facing down.

Use the 5/8" U-Bolts provided with the harrow assembly to attach the height bracket assembly to the top of the cultivators rear toolbar tube.

Secure with the 5/8" locknuts.
