Introduction

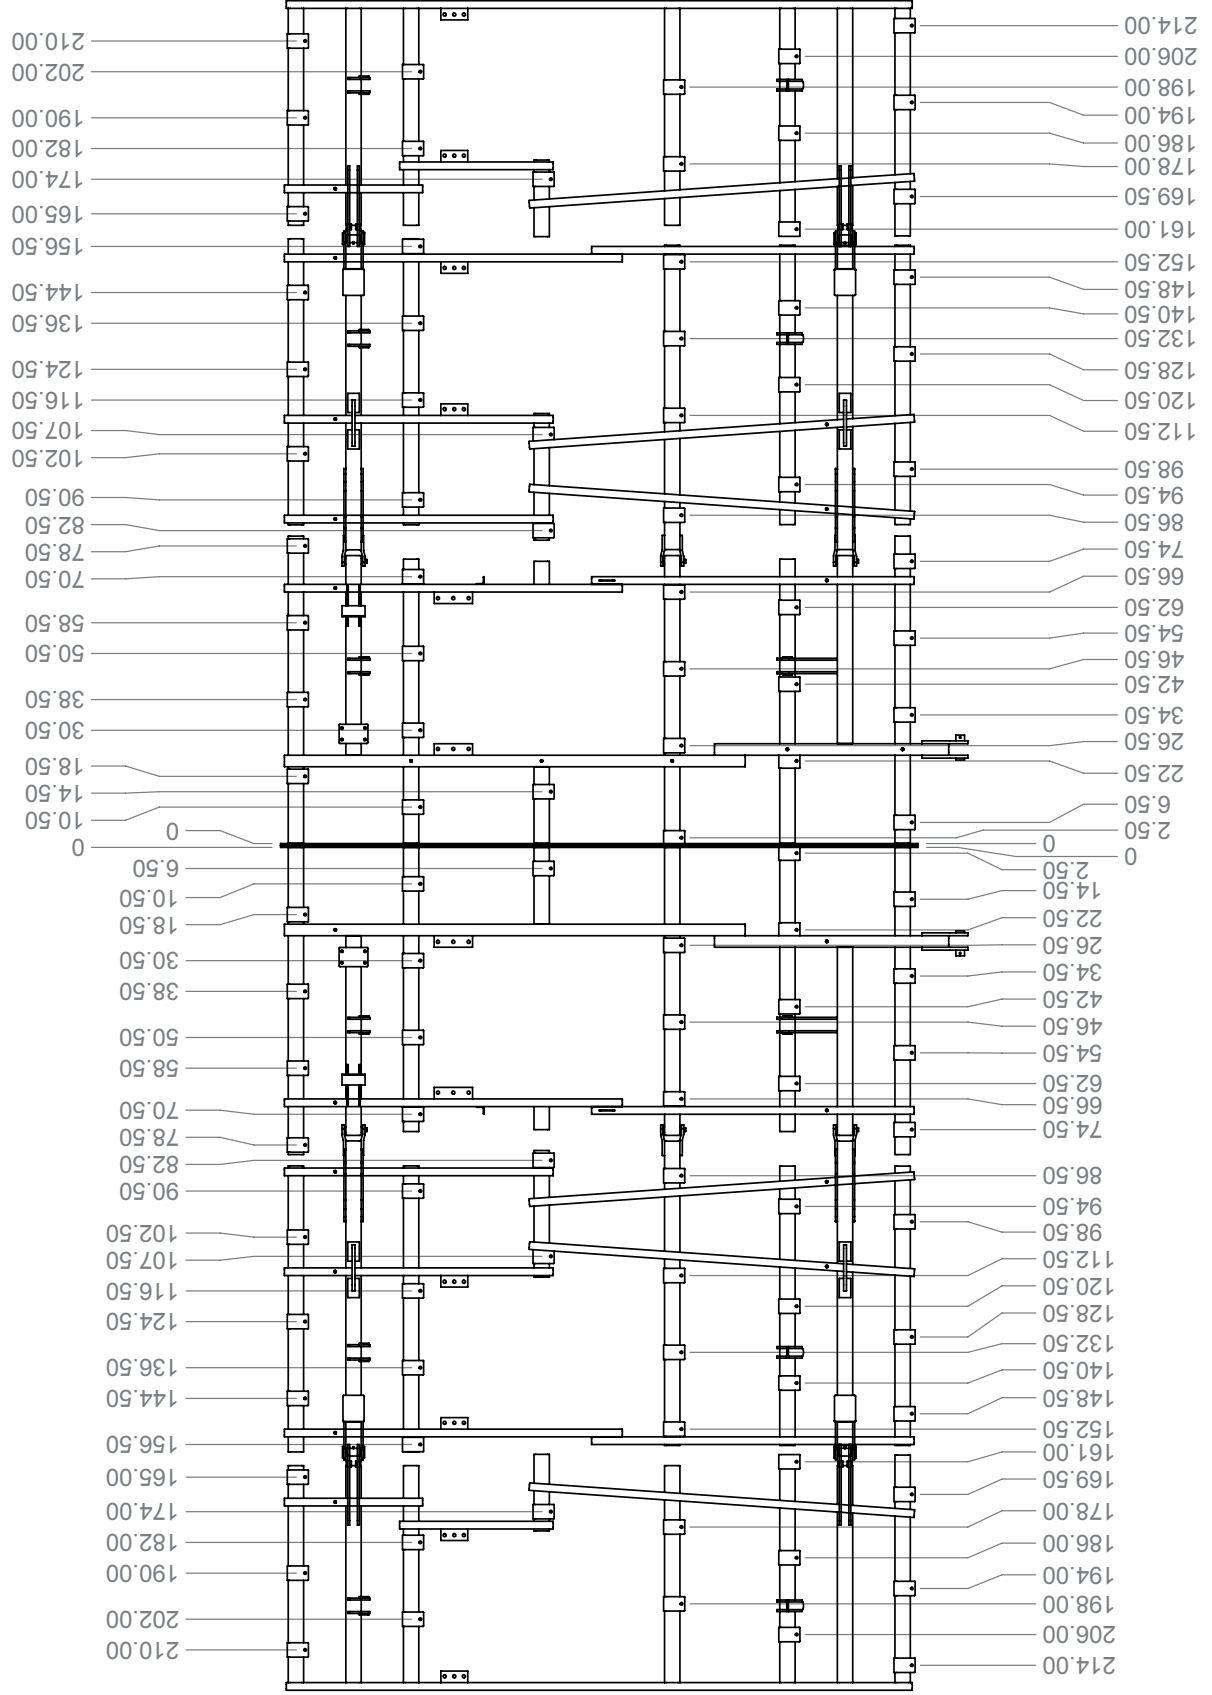

This booklet contains recommended layout patterns for 4" and 6" tine spacing and correlating harrow layouts for each different double fold cultivator width.

All dimensions in this booklet are referenced from the center frame connection rails. The measuring tape should be hooked onto the right side of the connection rails for left side dimensions and the left side of the connection rails for the right side dimensions. See reference image below.

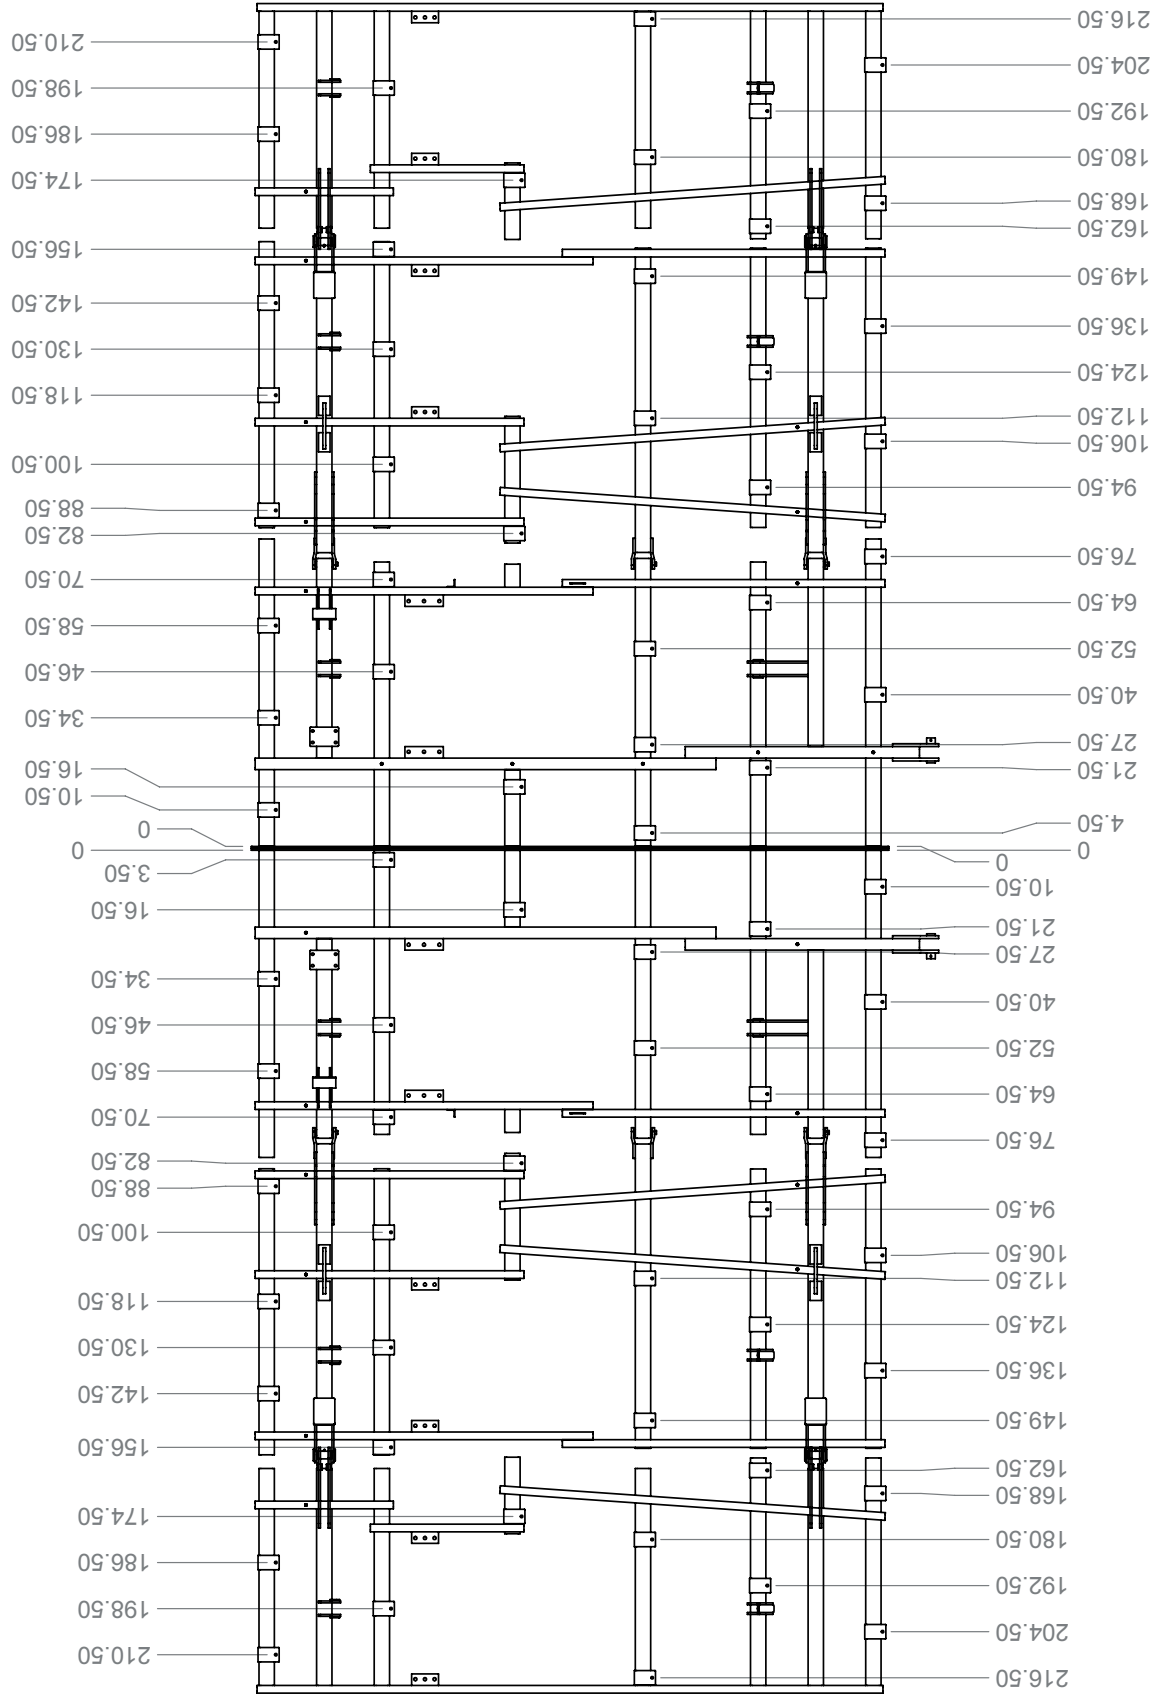

NOTE FOR HARROW LAYOUTS: Drag harrows come pre-assembled in the steep angle setting. If preference is to use the shallow angle setting as described in the harrow manual, then left and right side dimensions in this booklet for the harrow arms needs to be switched.
