Introduction:

Please take the time to carefully read all the instruction booklets provided with your new Kongskilde product. Once you are finished reading do not throw these guides out. Keep them for later review.

Do not operate this machine unless you have read and understood the instructions and safety information in the Kongskilde Operators Manual.

Failure to follow the instructions for safe operation of the equipment could result in serious injury or death. Proper care and operation of this implement is your responsibility.

Contact your dealer or Kongskilde for replacement manuals, safety decals and replacement parts.

These instruction booklets have been developed to assist you in assembling, adjusting and maintaining your new Kongskilde Product. To obtain optimal performance over the lifetime of the product read and follow these instructions carefully.

When the assembly of the unit is completed, please refer to the Owners Manual before attempting to adjust or use the product. The Owners Manual will provide you with further instructions on the proper Field Settings, Adjustments and Maintenance Procedures for Safe Operation of the unit.

If optional equipment or attachments have been ordered for your unit, please refer to the instruction booklets provided for proper installation and adjustment of these accessories.

Please take the time to fill out and return the Owners Registration and Warranty Form provided with the Owners Manual in order to activate the warranty coverage.

NOTES:

- Images in this manual are for reference only and may not exactly match actual components.
- This manual depicts "Left" and "Right" as if standing behind the unit facing forward.
- Refer to torque chart in Appendix B for proper tightening of bolts, unless otherwise noted.

Center Frame Assembly

Instructions:

- Hardware included in bag 760033012
- Connect center frames as shown, using parts listed on next page.
- Place center frames on steel shop stands during assembly until lift hydraulics are installed and working.

Rear Hitch Assembly (Optional)

Instructions:

- Hardware included in bag 760033026
- Remove the two rear bolts connecting the center frame halves.
- Attach the rear hitch weldment to the cultivator center frame using u-bolts provided.
- Loosely attach the support arm and spacers to cultivator where the two bolts were removed. Use the u-bolts provided to attach the support arm to the rear hitch and tighten up all hardware.
- Insert draw bar into rear hitch and install 3/4" bolt so drawbar cannot pull out.
- Insert hitch pin and secure with spring and hair pin.

Rear Hitch Hydraulic Kit Assembly (Optional)

INSTALLING REAR HITCH HYDRAULIC KIT- 760034003

-Requires Optional Rear Hitch 760034002

1. Attach coupler mount bracket (1) to rear hitch using 1/2"-13 x 1.25 cap screws (7) and 1/2"-13 lock nuts (8)
2. Install male couplers (4) to 3/8" x 432" hoses (2).
3. Slide male coupler end of hoses (2) through trimmed opening in rear hitch tube.
Note: If installing optional rear hitch light kit extension, route hoses and harness at same time.
4. Route hoses over existing hoses and clamps to front of cultivator.
5. Secure female couplers (3) to coupler bracket (1) using retaining rings (5) on either side of bracket (1) and inserted into two snap ring grooves on coupler (3).
6. Attach female end of hoses (2) to female couplers (5).
7. Secure hoses to existing hose clamps by using two hose holder clamps in each location, routing two hoses through each clamp.
8. Secure clamps to top of existing hose clamps using existing lock washer and nut.

Rear Hitch Light Kit Extension (Optional)

INSTALLING REAR HITCH LIGHT KIT EXTENSION - 760034006

-Requires Optional Rear Hitch 760034002

1. Attach coupler mount bracket using 3/8" x 1" bolts (3) and toplock nuts (4).
2. Run extension wiring harness (2) through cut out in left arm of rear hitch and down inside arm.
Note: If installing optional hydraulic kit, run hoses and harness at same time.
3. Disconnect existing left and right wire harnesses running from lights to main harness from the main harness at rear of implement.
4. Connect extension wiring harness (2) to main harness ensuring color of wires match.
5. Connect left and right light wiring harness from lights to extension wiring harness (2) ensuring color of wires match.

Assembly Completion

After assembly is complete, charge the wheel lift cylinders with a tractor or hydraulic unit, fully extending and retracting the cylinders several times. Hold the hydraulic lever open at the end of the stroke to purge the air from the system. Fully extend the lift cylinders and install the transport safety locks onto the center lift cylinders.

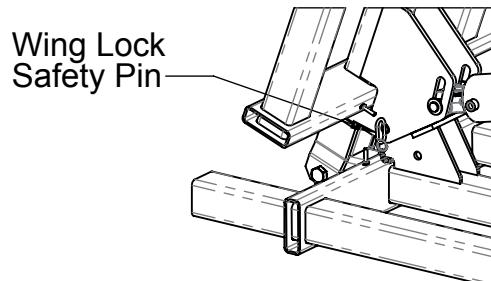

CAUTION: ALWAYS INSTALL THE TRANSPORT LOCK ONTO THE CENTER LIFT CYLINDERS WHEN THE IMPLEMENT IS PLACED IN THE RAISED POSITION FOR TRANSPORT, MAINTENANCE OR STORAGE. Secure with the pin and lock clip provided.

The wing fold cylinders must be charged with oil before attempting to fold the cultivator. Disconnect the cylinder rod clevis from the wings and block up the cylinder. Extend and retract the cylinders several times with a tractor or hydraulic unit, holding the lever at the end of the stroke to purge the air from the system. After fold cylinders are charged, re-connect them to the wings.

Slowly fold the wings to the transport position. Insert the wing lock safety pins.

CAUTION: ALWAYS INSTALL THE WING LOCK SAFETY PINS WHEN THE IMPLEMENT IS FOLDED FOR TRANSPORT, MAINTENANCE OR STORAGE.

CAUTION: Never transport the implement on public road ways without installing the transport safety chain and SMV sign.

Refer to the Owners Manual for further safety information before attempting to operate or service the unit.

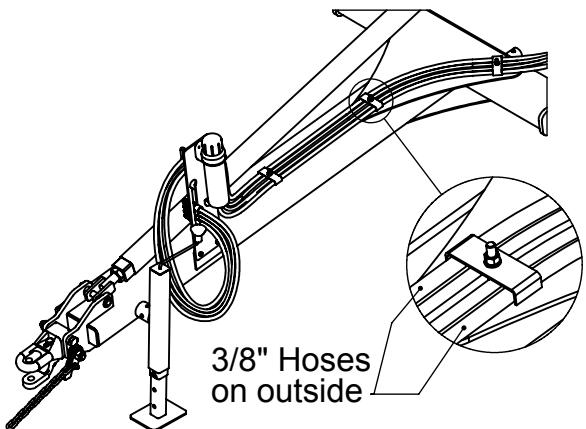

Final Inspection

When the machine is fully assembled, verify all nuts, bolts and other connections are secure. Be sure to read the Owners Manual before attempting to operate the unit. The Owners Manual provides important instructions and safety precautions that must be followed before attempting to hook up and move the unit after assembly.
